(54) Title: **ORGAN PRESERVATION AND TRANSPORTATION APPARATUS AND METHOD**

(57) Abstract: Apparatus and method for preserving an organ via perfusion at hypothermic and/or normo-thermic temperature in which an organ-receiving container (18) is arranged in a housing (10) and contains a medium compatible for preserving the organ. A connector (20) detachably mates with the container (18) to alternately enable access to an interior of the container (18) through an opening and seal the opening. A gas source (30) is arranged in the housing (10) and gas therefrom is directed into the container (18) through conduits. Preserving medium is removed from the container (18) and recirculated into the organ such that the preserving medium flow to the organ and the gas flow into the container (18) are separate from one another. Gas is thus absorbed into the medium only in the container (18). The container (18) is a separate unit from the housing and is separable from the housing. The container (18) can be rendered a self-standing disposable unit which is easily replaced and inclusive of perfusion medium.

<b>A. CLASSIFICATION OF SUBJECT MATTER</b>		
IPC(7) : A01N 1/02		
US CL : 435/284.1, 286.5, 286.6		
According to International Patent Classification (IPC) or to both national classification and IPC		
<b>B. FIELDS SEARCHED</b>		
Minimum documentation searched (classification system followed by classification symbols) U.S. : 435/284.1, 286.5, 286.6		
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched		
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)		
<b>C. DOCUMENTS CONSIDERED TO BE RELEVANT</b>		
Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/29800

## Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claim Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claim Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claim Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐  
☐

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.
